

# Alumni Cell

**Dr. M. SEETHAPATHI** is currently serving as the Head of the Department of Civil Engineering at Tamilnadu College of Engineering. He is Incharge for Alumni Cell Coordinator.

The Alumni Cell of Tamilnadu College of Engineering, established in the year 1990, serves as a vital platform to strengthen and sustain the lifelong relationship between the institution and its alumni. Over the years, our alumni have emerged as accomplished engineers, innovators, entrepreneurs, researchers and leaders, contributing significantly to industries, academia and society across the globe.

The primary objective of the Alumni Cell is to build and nurture a dynamic and engaged alumni network that promotes collaboration and mutual growth. The cell actively fosters technical mentorship, industry academia interaction, professional networking and entrepreneurial guidance, thereby creating meaningful opportunities for knowledge exchange and institutional development. The Alumni Cell plays a crucial role in bridging the gap between academic learning and industrial practices. Through active alumni participation in technical talks, expert lectures, internships, placement support, research guidance, startup mentoring and innovation driven initiatives, the cell enhances student's professional competencies and equips them with industry relevant skills.

In addition, the Alumni Cell encourages alumni involvement in curriculum enrichment, career counseling, project guidance and institutional development activities. These interactions help students gain practical insights, build professional confidence and prepare effectively to meet global engineering challenges. We strongly encourage our alumni to remain connected with the institution, share their expertise and experiences and actively contribute to mentoring and guiding future engineers, thereby strengthening the legacy and reputation of Tamilnadu College of Engineering.
